**1. Election/Restrictions**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 27-29, 98, and 102-112, drawn to a closed substrate platform, method of using such a platform in sample analysis, and method of making thereof, classified in class 422, subclass 68.1.
- II. Claim 83, drawn to a method for identifying a nucleic acid capable of binding to a biomolecule, classified in class 435, subclass 6.
- III. Claims 88-90, drawn to a method for identifying a polypeptide capable of binding to a biomolecule, classified in class 435, subclass 7.1.

The inventions are distinct, each from the other because of the following reasons:

A) Inventions (II, III) and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice other materially different processes, such as the materially different processes of Groups II and III.

B) The methods of Groups II and III are distinct as having different steps and parameters. Invention II relates to identifying nucleic acids which bind to a biomolecule of interest, whereas Invention III relates to identifying polypeptides that bind to a biomolecule of interest. Nucleic acids and polypeptides are completely different chemical entities used for entirely different applications. Thus, the two groups of inventions are unobvious over one another.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
